Search Topic Information:

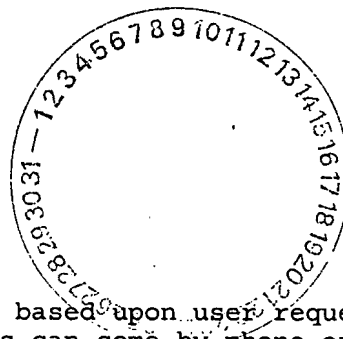

The inventor is claiming a method of re-releasing movies based upon user requests. The first step is to receive requests from users these requests can come by phone or by website. Then determine a "threshold" or a predicted set value of money to be made this threshold can be money or commitment where the commitment is constantly monitored and compared to interest level data. Interest level data is defined as the commitment data, where it is grouped by location and movie. Upon reaching the set goal the users are notified and the movie is played. The inventor goes on to claim a website where everyone logs on to search movies, identify locations, and make requests and the interest level of a movie is displayed on the website. The website will also be linked to other websites to provide information on a movie, could be something like Internet Movie Database or the like. Payment can be made before the threshold is met or after. The inventor further claims the refund process involved if the set value is not met. The inventor further defines "Threshold" to be determined by profit or commitment. If there seems to be a large number of people interested the movie will be shown. The inventor further states that when notifying the users will be told the location, where it will be shown, and location includes a place, a time and a date. Also stating the process of allowing a user or group of users to pay a premium if the threshold is not met, where premium is an additional cost. The inventor defines Movie as: previously released movie, never released movie such as a straight to DVD movie, Historical documentary, production or planning stage, and a visual/audio performance. The inventor also claims the code for this method on a computer readable medium.

Abstract: System and methods for viewing a previously run movie in a theater. Users request to view a movie at a website. The movie is associated with a location and/or a threshold. The threshold is related to users that commit to view the movie. At the website, users commit to view the movie by paying now or by paying when the threshold is satisfied. When the threshold of a movie is satisfied, the users that have committed to view the movie are notified that the movie will be shown at a particular location.

Special Instructions and Other Comments:

I can be contacted between 7:30am and 5pm my number is (571)270-5097 or I can be contacted via email

Title Terms.../Index Terms/Additional Words: MOVIE ;

Original Publication Data by Authority

Original Abstracts:

Systems and methods for viewing a previously run movie in a theater. Users request to view a movie at a website. The movie is associated with a location and/or a threshold. The threshold is related to users that commit to view the movie . At the website, users commit to view the movie by paying now or by paying when the threshold is satisfied. When the threshold of a movie is satisfied, the users that have committed to view the movie are notified that the movie will be shown at a particular location. >

Claims:

What is claimed is:1. A method for viewing a movie in a theater, the method comprising:receiving a request from one or more users to view a movie in a theater in a particular location, wherein the movie is

associated with a threshold;receiving a commitment to purchase a ticket to the movie from the one or more users if the threshold is not satisfied; **determining** whether a threshold for the movie is satisfied; andnotifying the one or more users when the threshold is satisfied **and** that the movie can be **viewed** in the **theater** by the one or more users.

...SPECIFICATION in accordance with a preferred embodiment. Processing
commences at 2200 when a user inserts a DVD with BCA information into a
player, and the redirect operation is initiated by a user...

...Then the server performs a table lookup to ascertain the support
organization for the original DVD as shown in function block 2230. The
support organization becomes the target for the support request that
the user initiated in function block 2210, and, if allowed, the support
transaction is re-routed to the support organization associated with the
DVD in function block 2240. Otherwise, the user is redirected to a
location informing the user that support location is not available.
Finally a transaction is posted to the server database that memorializes
the...

Title: Minimal and non-minimal optimal fixed- order compensators for time-varying discrete-time systems

...Abstract: time optimal projection equations (SDOPE) and associated boundary conditions are derived for finite-horizon fixed- **order** LQG compensation. They constitute a two-point boundary value problem explicit in the LQG problem parameters which is equivalent to first- **order** necessary optimality conditions and which is suitable for numerical solution. The minimality property implies that minimal compensators have time-varying dimensions and that the finite-horizon optimal full- **order compensator** is not minimal. The use of the Moore-Penrose pseudo-inverse is further exploited to reveal that the...

TEXT:

...year, sci-fi performed very well on a per-title basis.

With horror and action films also doing well, the figures underline how demographically different the rental market is to the retail sector, with a definite bias against families with children. Family titles and animated films took on average just \$11m each. It was a very poor year for both these genres. Animation films did pull back to a 7-8 per cent market share in November and December, but it was not enough to compensate for the rest of the year.

It was drama which took the largest share of...

... with its well-established brand promise of magic, family entertainment, and fun) decided to produce **movies** for customers outside its traditional market in the early 1980s, they launched an entirely new brand with its own creative strategy to market these **movies** --Touchstone Pictures. With this initiative, the company that brought us family classics like Snow White can effectively deliver Pretty Woman and other high quality, live-action **films** aimed at young adults and older viewers. Via Touchstone, Disney can reach a new customer...relevant to the customer. How will you know? Ask your customers through "live" or "real- **time** " research! They will let you know how often to **communicate** , in what form, and with what content. (Many companies report that quarterly communication seems to be a **minimum** in **order** to maintain desired results after having tested the proposition.)

Finally, it is important to know...

No results were found.

You may want to try your search again after following one or more of these tips:

- Check the spelling of your search terms. Correct any misspellings and re-run the search.
- To broaden your search, use the Boolean operator OR. For example, type: Siamese OR cats.

See [hints](#) for suggestions.[Refine Search](#)[Search History/Alerts](#)[Results](#)
